Anupama Singh

Seattle, WA •425-900-7555 • singh.anup@northeastern.edu • LinkedIn • GitHub

Education

Northeastern University, Seattle, WA

GPA: 3.9/4

Dec 2022

Master of Science in Information system related courses are Object-Oriented Programming, Program Structure and Algorithms, Web Design, Data Management, and Database Design, Web Development, Smartphone-Based web Development and Adv. User Experience, , Network Structures & Cloud computing

Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal, MP

GPA: 3.3/4

Jun 2010 - Jun 2014

Bachelor of Engineering in Electronics & Communication

Technical Skills

Programming Languages: C, Java, JavaScript, Swift, Python

Web Technologies: HTML, CSS, React, XML, JSON, Node.js, SPA, RESTful, iOS

Database: MySQL, MongoDB (No-SQL), SQL

Tools: IntelliJ, Git, dBeaver, VSCode, MongoDB compass, PyCharm, XCode, Figma, Postman

Cloud Technologies & Frameworks: AWS, CloudFormation, Packer

Experience

Northeastern University

Teaching Assistant Web Development Tools and Methods

May 2022 - Sept 2022

Teaching Assistant Program Structure & Algorithm

Jan 2022 - May 2022

Nokia Solutions and Networks

Oct 2017 - Dec 2019

Software Engineer, Dozo(Objective-C, Swift JSON, iBeacons, Fastlane)

- Worked on integrating Beacon-Stream SDK which helps to get Promotions using iBeacons technology, and developed a promotion detail page for users to see details and perform action like share, rate & write reviews
- Implemented CI/CD using Fastlane, CI/CD pipeline supports running test on new Pull Request, iOS certificate management, TestFlight and App Store build submission with screenshots, reduced line of codes by 20%

Academic Projects

User management (Node.js, REST API & AWS Infrastructure, CI/CD GitHub actions)

Sept 2022 - Dec 2022

- Created CloudFormation Template, RESTful APIs with AWS Infrastructure & deployed serverless functions like AWS Lambda, published user verification emails via SNS by storing verification tokens into DynamoDB
- Implemented continuous integration with GitHub workflow actions along with integration testing to build a refactorable clean, and reliable code base, reducing the number of code lines by 10%

Stock Portfolio Manager (HTML, CSS, Node.js, Express.js, REST API & JavaScript)

Feb 2022 - May 2022

- Implemented end-to-end design and developed a web-based app to manage stock portfolio where user will login, add, update, delete stocks and logout
- Utilized financialmodelingprep API to get real time data, improved usability of the application by 10%

Food Delivery Website (React, JSX, Node.js & JavaScript)

Nov 2021 - Dec 2021

- Created a React-based Single-Page Application (SPA) Food Delivery website and facilitated menu & delicacy search among thousands of restaurants in the given location within a millisecond
- Followed full-stack design principles, did unit testing and integration testing to build a refactorable clean, and reliable code base, reducing the number of code lines by 15%

Hospital Database Management System (Lucid Chart, SQL)

Sept 2021 - Nov 2021

- Ideated, designed (ERD), and Implemented database for a hospital using MySQL (RDMS)
- Database was designed to maintain all the data from medical, financial & administrative services

Automotive Dealer Java App Development (Java, Object-Oriented design, & Swing)

Jan 2021 - Apr 2021

- Created Automotive Dealer app using Java, swing, and object-oriented programming for customers to find automotive dealers in their region within 50 miles and use forms to submit their interest in cars
- Corroborated with 4 people in user cases and took responsibility for my team to maintain each screen with a faster user experience by modifying the algorithm of methods and UI designs
